PROFESSIONAL SUMMARY

AI Engineer and AI Solutions Architect with 2+ years of experience building and deploying end-to-end AI systems across generative AI and agentic automation. Expert in LLMs, chatbots, RAG pipelines, prompt engineering, and real-time inference systems. Strong background in document intelligence, autonomous agents, and SaaS AI assistants that drive workflow automation and business impact.

TECHNICAL SKILLS

- **NLP & Generative AI:** LLM models, RAG Systems, Text Generation, Prompt Engineering, Chatbots, OpenAI, Streaming Response, Vertex AI
- **Agentic AI:** LangGraph Orchestration, tool calling, MCP server, Custom Agent Building
- **Programming:** Python, Dart, Java, SQL, MySQL, MongoDB
- **Frameworks:** Scikit-Learn, LangChain, LangGraph, LangSmith, Firebase, N8N, NumPy, Ollama, Hugging Face, Pandas, Streamlit etc.
- **MLOps & Deployment:** Docker, Model Optimisation, REST API Development, Real-time Inference Pipelines
- **Web Development:** Flask, FastAPI, HTML, CSS, JavaScript

PROFESSIONAL EXPERIENCE

AI Engineer | Plusinfosys

JAN 2024 – Present

- Designed and developed **LLM-powered applications** including chatbots, RAG-based systems, and multi-agent workflows for enterprise use cases.
- Built and maintained **Multi-RAG, Hybrid RAG, and Agentic RAG pipelines** to enable accurate knowledge retrieval and reasoning across large document repositories.
- Implemented **agentic flows** using LangGraph, Vertex AI workflows, and **N8N** for orchestration of tools, APIs, and business processes.
- Developed **FastAPI-based backend services** to serve real-time inference, streaming responses, and LLM integrations.
- Created intelligent **conversational AI systems** that convert natural language into structured actions and automated workflows.
- Developed Streamlit-based dashboards for monitoring model behavior, outputs, and system performance.
- Collaborated with cross-functional teams to design scalable AI architectures and deliver production-ready solutions

PROJECT HIGHLIGHTS

AI Solutions Architect – PMPeople (SaaS)

- Designed and launched multiple AI-powered assistants for project information, help/documentation, and action-based automation.
- Built conversational AI agents that convert natural language into platform actions (task creation, updates, assignments, scheduling).
- Developed Document Intelligence AI to generate milestones and work packages from client requirement documents.
- Created a Virtual Project Manager AI model to automate end-to-end project planning and coordination

AI Product Marketing Assistant

- Built an **AI Marketing Agent** for product marketing and content automation.
- Developed AI agents to collect **real-time, high-quality marketing data** using Perplexity API, Clay, and web scraping, followed by intelligent filtering.
- Created an automated system to **generate and publish content** directly to LinkedIn, Twitter/X, Reddit, Medium, and company blogs.
- Achieved **80% reduction in content creation time** and **30% increase in email campaign reply rates** through personalized outbound marketing.

HR Mail Intelligence System

- Developed an HR Email Classification System for a pharmaceutical company using a locally hosted LLM.
- Automated classification of 20+ HR email categories (recruitment, payroll, leave, compliance, onboarding, benefits, etc.).
- Deployed the solution on an on-premise/local server to ensure data privacy, security, and regulatory compliance.

Automation for App development task

- Integrated messaging platforms with CRM to **automatically classify client messages** into tasks, bugs, change requests, and errors for the development team.
- Reduced manual task triage for Project Managers by **40%** through intelligent automation and real-time CRM updates.

Custom js extension for the marketing team

- Leveraged **Perplexity Deep Research** to extract company intelligence and required marketing details, enabling faster prospect research.
- Used a **self-hosted LLM** to automatically generate personalized marketing emails from collected data.
- Built **LinkedIn and Zoho CRM connectors** to automatically capture and sync new leads into Zoho CRM.
- Developed a **LinkedIn Profile Scraper** for custom data collection and enrichment

EDUCATION

B.E. in Information Technology - CGPA 8.04/10

Gandhinagar Institute of Technology, Gandhinagar, Gujarat

2020 – 2024
